Circular Letter No. 06-1487

# RE: NCCI Item B-1399 – Revisions to Basic Manual Classifications for the Aviation Industry

The Minnesota Department of Commerce has approved the above filing to become effective 12:01 a.m., January 1, 2007, for new and renewal business.

The purpose of the above filing item is to eliminate, clarify, combine classifications and/or modernize certain classification phraseologies and references in the *Minnesota Basic Manual* to better reflect current business operations within the aviation industry. The following manual changes will occur as a result of the approval of Item B-1399:

- The main industry headings will be changed from "Aircraft" or "Helicopter" to "Aviation"
- Code 7409 will be deleted & its exposures transferred to Code 7420
- Code 7423 will be deleted & its exposures transferred to Code 7403
- Code 7405 will include all Part 121 operations
- Code 7431 will include all operations other than for Part 121
- All helicopter operations will now be classified under Code 7425
- Code 7403 will apply to all other employees including ground personnel & drivers

In examining the potential rate impact of Item B-1399 for 2007, MWCIA's Actuarial staff determined that the impact of transferring exposure data from Code 7409 to Code 7420 and from Code 7423 to Code 7403 will be largely dependent on the number of employers previously classified under Code 7409 or Code 7423. [Please note: the rate transition program proposed by NCCI will not apply in Minnesota.]

A copy of National Council's original filing memorandum is included to provide additional background information on Item B-1399. To be consistent with MWCIA's handling of filing exhibits in Minnesota, MWCIA staff have incorporated any pertinent sub-parts from NCCI's Item B-1399 filing materials that affect "Part Two – Classifications" in the Minnesota Basic Manual into Minnesota's filing as a single Exhibit I as well as any additional changes deemed necessary to comply with the styling/format of the Minnesota Basic Manual. As you review Minnesota's filing materials, please note that Exhibits I and II illustrate the changes necessary to the Minnesota Basic Manual and Exhibit III illustrates the changes necessary to the "Table of Classifications by Hazard Group" in NCCI's Retrospective Rating Plan Manual and that strikethroughs represent deleted text while underlining represents new or amended text. Finally, please note that Column One of MWCIA's Exhibits I and II represents the current language in the Minnesota Basic Manual and that Column Two represents Minnesota's manual language after the approval of Item B-1399.

Please direct any questions you may have regarding this filing item to MWCIA's Member & Customer Services' staff at 952.897.1737 (Option 1) or via email at <a href="mailto:info@mwcia.org">info@mwcia.org</a>.

### **A NOTICE TO MEMBERSHIP:**

The Minnesota Department of Commerce requests that MWCIA remind its members that the above filing only applies automatically to insurance companies who have filed a Limited Power of Attorney agreement with our Commerce Department. A properly executed Limited Power of Attorney authorizes MWCIA to make filings on behalf of individual insurance companies. Any insurance company who has not filed a Limited Power of Attorney must independently submit the changes represented in each filing item to the Minnesota Department of Commerce for their approval.

### FILING MEMORANDUM

# ITEM B-1399—REVISIONS TO BASIC MANUAL CLASSIFICATIONS FOR THE AVIATION INDUSTRY

### **PURPOSE**

The purpose of this item is to clarify, eliminate, or combine classifications in NCCl's **Basic Manual for Workers Compensation and Employers Liability Insurance** for the aviation industry to reflect current business and industry needs.

### **BACKGROUND**

NCCI has an ongoing process dedicated to the systematic research, analysis, and maintenance of its classification system. This is done to ensure that the classification system remains healthy, viable, and responsive to the needs of various industry stakeholders, and to evolve the system to stay in step with the constantly changing ways that various industries and their operations respond to technological, competitive, and regulatory changes.

Classifications, and industry-grouped classifications, are analyzed to determine which, if any, should be considered for modernization, consolidation, elimination, or clarification. This item filing includes proposals for the aviation industry classifications identified in each exhibit.

NCCI's analysis of the class system is national in scope and the recommendations within this item are being proposed in all NCCI states. We recognize, however, the occasional need for state-specific classification treatments to reflect geographical differences. Such treatments are also incorporated within this filing.

### **BASIS FOR CHANGE**

The phraseologies for Codes 7403, 7405, 7423, and 7431 make reference to Federal Aviation Regulations (FARs) covering the size, operation, and safety rules for aircraft. These regulations can and have changed over time, causing confusion in the proper classification for various aircraft operations. Most commercial aircraft operate under Title 14, Part 135 or 121 of the FARs.

On December 14, 1995, the Federal Aviation Administration (FAA) introduced a new set of rules referred to as the "Commuter Initiatives." Prior to these initiatives, Part 135 of the FARs was defined as aircraft with 30 seats or less and a maximum 7,500-pound payload. Per the FAA, "It was perceived by many in the aviation community that due to the types of operations and configurations of the aircraft, commuter aircraft had to meet less rigorous operations and maintenance standards. Under the final Commuter Initiatives, all scheduled airline passenger operations with airplanes having 10 seats or more were required to be operated under the same safety rules that apply to larger (FARs Part 121) airplanes."

Major airlines usually operate from centrally located airports called "hubs." Passengers arriving at the hub can transfer to flights to any of the locations served by the airline's system, including internationally. Commuter or regional carriers operate short- and medium-haul scheduled airline service connecting smaller communities with larger cities and hubs. Some of the largest regional carriers are subsidiaries of the major airlines, but most are independent and will often contract their services to the major airlines. The regional airlines' fleet consists primarily of smaller 19- to 68-seat turboprop and 30- to 100-seat jet aircraft.

B-1399 PAGE 2

### FILING MEMORANDUM

# ITEM B-1399—REVISIONS TO BASIC MANUAL CLASSIFICATIONS FOR THE AVIATION INDUSTRY

The exposure and loss experience of Code 7403—Aircraft or Helicopter Operation—Air Carrier—Scheduled or Supplemental—All Other Employees and Code 7423—Aircraft or Helicopter Operation—Air Carrier—Commuter—All Other Employees & Drivers should be combined, and Code 7423 should be discontinued. The operations, hazards, and loss cost/rates associated with Codes 7403 and 7423 are very similar. Airport or heliport operations will also be reassigned to Code 7403.

Air charter and air taxi services provide on-demand air transportation for individuals or small groups. The companies fly to most of the major airports in the United States, and also to many smaller airports. Chartered flights have a significantly less favorable safety record than those operated by scheduled commercial airlines. Part of the reason is that charter operators can range from very sophisticated to inexperienced, as well as using ultramodern aircraft versus relying on outdated models.

Code 7405—Aircraft or Helicopter Operation—Air Carrier—Scheduled or Supplemental—Flying Crew will be revised to include "all Part 121" operations, while Code 7431—Aircraft or Helicopter Operation—Air Carrier—Commuter—Flying Crew will be revised to include operations other than Part 121. This will eliminate the confusion created by potential changes to FARs and changes to a carrier's fleet with regard to aircraft capacities. The classifications will focus on an insured's principal business in lieu of the types of aircraft used to perform their activities. The aircraft industry always follows the FAA's guidelines, as should NCCI with our classifications.

Helicopters are the most versatile aircraft in existence, giving the pilot access to three-dimensional space. This means that a helicopter can move up and down, forward and backward, and side to side, not to mention hover in midair. The flexibility of a helicopter makes it more complicated to fly than an airplane, and requires the pilot to think in three dimensions and use both arms and legs constantly to stay airborne. Currently, the wording for Code 7425—Aircraft or Helicopter Operation—NOC—Helicopters—Flying Crew instructs the user to classify the nature of the operation in lieu of the nature of the aircraft when a helicopter is performing functions normally performed by a fixed-wing aircraft. The analysis of this industry indicates that helicopters are more difficult, and thus potentially more hazardous, to operate. Thus, all helicopter operations should be assigned to Code 7425.

Alaska and Missouri state special Code 7418—Aircraft or Helicopter Operation—Patrol, Photography Mapping or Survey Work—Flying Crew should be discontinued and the operations combined with newly defined national Code 7422—Aviation—NOC—Other Than Helicopters—Flying Crew. The operations, hazards and loss cost/rates associated with these codes are very similar, while the credibility of Code 7418 is quite low.

The exposure and loss experience of Code 7409—Aircraft or Helicopter Operation—Aerial Application, Seeding, Herding, or Scintillometer Surveying—Flying Crew and Code 7420—Aircraft or Helicopter Operation—Public Exhibition Involving Stunt Flying, Racing, or Parachute Jumping—Flying Crew should be combined, and Code 7409 should be discontinued. The operations, hazards and loss cost/rates associated with these codes are very similar, while their respective credibilities are quite low. Currently, there is more payroll and premium in Code 7409, but it is not applicable in five NCCI states. Those states already assign Code 7420 to the activities described by Code 7409.

Air traffic controllers should be assigned to newly defined Code 7403—Aviation—Airport or Heliport Operator—All Employees & Drivers. Their responsibilities and duties are essential at a majority of airports.

B-1399 PAGE 3

### FILING MEMORANDUM

# ITEM B-1399—REVISIONS TO BASIC MANUAL CLASSIFICATIONS FOR THE AVIATION INDUSTRY

Air traffic controllers rotate working nights and weekends, and may sometimes operate under extremely stressful conditions. The impact of this change should be minimal because most air traffic controllers are federal employees.

Nevada state special Code 7408—Aircraft or Helicopter Operation—Search, Rescue and Law Enforcement—Volunteer—All Members of Flying Crew & Clerical, Salespersons should be discontinued because there have been no exposures or claims reported for this code since 2000.

Three of the existing aviation codes have statistical codes related to them as noted below. NCCI does not propose any changes to these statistical codes:

- Statistical Code 7445 is assigned in conjunction with Code 7405—Aircraft or Helicopter Operation—Air Carrier—Scheduled or Supplemental—Flying Crew, to reflect nonratable catastrophe loading
- Statistical Code 7453 is assigned in conjunction with Code 7431—Aircraft or Helicopter Operation—Air Carrier—Commuter—Flying Crew, to reflect nonratable catastrophe loading
- Statistical Code 9108 is assigned in conjunction with Code 7421—Aircraft or Helicopter
  Operation—Transportation of Personnel in Conduct of Employer's Business—Flying Crew, to reflect a
  per passenger seat surcharge

### **PROPOSAL**

The focus of the proposed changes for this industry is to combine operations into classifications that reflect the exposures common to those operations. It is proposed that effective July 1, 2006, the classifications indicated in the attached exhibits be implemented in each state as shown.

### NCCI recommends the following national classification treatment:

- 1. The industry name, which is used to link the related classification wording, will be changed to Aviation in lieu of Aircraft or Helicopter Operation.
- 2. Discontinue Code 7423 and reassign all insureds having operations previously under Code 7423 to newly created and newly defined wording for existing Code 7403.
  - Code 7403 will apply to ground personnel for all aviation operations
  - Code 7403 will apply to Airport or Heliport Operator—All Other Employees & Drivers

**Impact:** A review has been conducted using the current approved loss cost or rate filing experience to determine the need for a loss cost or rate transition program to minimize the impact of the these proposed changes. Based on the result of this review, it is recommended that the following eight states need a two-year transition program: AR, AZ, LA, MD, ME, MO, NM, and TN. The other states' filed loss cost or rate change, or estimated premium impacts did not warrant a transition program. Using the combined experience from the two codes to calculate the loss cost or rate, implemented either with or without a transition program, will minimize any change in overall statewide premium. The impact to individual risk premium will vary depending on current payroll distribution between the codes and the resulting combined loss cost or rate.

B-1399 PAGE 4

### FILING MEMORANDUM

# ITEM B-1399—REVISIONS TO BASIC MANUAL CLASSIFICATIONS FOR THE AVIATION INDUSTRY

**Application:** The implementation of these proposed changes will depend on whether or not a transition program is needed. Use the table below to determine how to implement Proposal 2.

If your state is	Then
AK	Proposal 2 does not apply since neither Code 7403 nor Code 7423 is applicable in Alaska.

If your state is	Then
AL, CO, CT, DC, FL, GA, HI, IA, ID, IL, IN, KS, KY, MS, MT, NC, NE, NH, NV, OK, OR, RI, SC, SD, UT, VA, VT	<ul> <li>You will not need a transition to implement Proposal 2.</li> <li>Effective July 1, 2006, for new and renewal business, Code 7423 will be discontinued and combined with Code 7403.</li> <li>Changes from Proposal 2 are effective on July 1, 2006 regardless of a particular state's loss cost or rate filing effective date.</li> <li>Initially the new rate/loss cost for Code 7403 will be calculated as a payroll weighted average of the rates/loss costs of Code 7403 and Code 7423. Thereafter, the data for Code 7423 will be combined with the data for Code 7403 prior to deriving the rate/loss cost.</li> <li>The necessary July 1, 2006 effective loss cost or rate-related changes from this Item will be published upon approval, along with other manual</li> </ul>
	page updates.

### FILING MEMORANDUM

# ITEM B-1399—REVISIONS TO BASIC MANUAL CLASSIFICATIONS FOR THE AVIATION INDUSTRY

If your state is	Then
AR, AZ, LA, MD, ME, MO, NM, TN	<ul> <li>You will need a transition program to implement Proposal 2.</li> <li>Effective July 1, 2006, an internal transition program will be executed by NCCI to provide a two-year rate/loss cost and rating value transition for Codes 7423 and 7403. The transition program will be implemented with the applicable state rate filing on or after July 1, 2006.</li> <li>The current national phraseology and wording for Code 7423 and Code 7403 will become state special wording in the eight states noted during the two-year transition program. This state special wording will then be replaced by the new national wording for Code 7403 upon completion of the transition program.</li> <li>As of July 1, 2008, for new and renewal business, Code 7423 will be discontinued and all insureds having operations previously under Code 7423 be reassigned to Code 7403. July 1, 2008 will be considered the completion date of the transition program.</li> <li>Changes from Proposal 2 are effective on July 1, 2008 regardless of a particular state's loss cost or rate filing effective date.</li> <li>Exhibit 22 contains the rules for the two-year transition program.</li> <li>Exhibit 22A contains an example of a two-year transition program</li> </ul>
	<ul> <li>replaced by the new national wording for Code 7403 upon completion of the transition program.</li> <li>As of July 1, 2008, for new and renewal business, Code 7423 will be discontinued and all insureds having operations previously under Code 7423 be reassigned to Code 7403. July 1, 2008 will be considered the completion date of the transition program.</li> <li>Changes from Proposal 2 are effective on July 1, 2008 regardless of a particular state's loss cost or rate filing effective date.</li> <li>Exhibit 22 contains the rules for the two-year transition program.</li> </ul>

3. Revise Code 7405 to include the flying crew of all FAR Part 121 operations, while Code 7431 will be revised to include the flying crew of operations other than FAR Part 121.

Impact: It is estimated that some risk payroll from Code 7431 will be transferred to newly defined Code 7405—Aviation—Air Carrier—Scheduled, Commuter or Supplemental—Flying because of this change. No modification or adjustment to filed loss costs or rates is proposed for these codes. The amount of payroll transferred cannot be obtained using current industry data sources. It is estimated that the amount of payroll transferred and/or the differences in loss cost or rate is not large enough to result in a significant change in overall statewide premium. The impact to individual risks will vary depending on their current code payroll assignments in Code 7431 and the amount of payroll transferred from Code 7431 to Code 7405. The class codes' loss costs or rates will eventually reflect the new phraseology and underlying experience of all risks with payroll and loss experience assigned to these classifications.

**Application:** Changes from Proposal 3 are effective on July 1, 2006 regardless of a particular state's loss cost or rate filing effective date. See the Chart Appendix for state applicability.

4. The flying crew of air taxi or sightseeing operations will be reassigned to Code 7431 instead of Code 7422.

**Impact:** This change is expected to better align the operations involved with their associated work hazards. The impact to risks and their premiums cannot be determined definitively using any currently

B-1399 PAGE 6

### FILING MEMORANDUM

# ITEM B-1399—REVISIONS TO BASIC MANUAL CLASSIFICATIONS FOR THE AVIATION INDUSTRY

available data source, but the number of entities with operations consisting of this type of work is expected to be small; therefore, the statewide premium impact is expected to be small. The premium impact for each individual risk will vary depending on the amount of exposure that is reassigned from Code 7422 to Code 7431. No modifications or adjustments to filed loss costs or rates are proposed for this portion of the recommendation. The class code's loss cost or rate will eventually reflect the new phraseology and underlying experience of all risks with payroll and loss experience assigned to that classification.

**Application:** Changes from Proposal 4 are effective on July 1, 2006 regardless of a particular state's loss cost or rate filing effective date. See the Chart Appendix for state applicability.

- 5. Discontinue Code 7409 and reassign all insureds having flying crew operations previously under Code 7409 to newly created and newly defined wording for existing Code 7420.
  - Code 7420 will apply to the flying crew of aerial applicators, seeding, herding, and scintillometer surveying
  - Code 7420 will apply to stunt flying, racing, or parachute jumping
  - · Code 7420 will apply to aerial firefighting
  - The new loss cost/rate and rating values for Code 7420 will be determined on combined data of both Codes 7409 and 7420. Initially the new rate/loss cost for Code 7420 will be calculated as a payroll weighted average of the rate/loss costs of Code 7409 and Code 7420. Thereafter, the data for Code 7409 will be combined with the data for Code 7420 prior to deriving the rate/loss cost.

**Impact:** A review has been conducted using the current approved loss cost or rate filing experience to determine the need for a loss cost or rate transition program. Based on the result of this review, in all states the filed loss cost or rate changes or estimated premium impacts did not warrant a transition program. Using the combined experience from the two codes to calculate the loss cost or rate will minimize the change in overall statewide premium. The impact to individual risk premium will vary depending on current payroll distribution between the codes and the resulting combined loss cost or rate. The class code's loss cost or rate will eventually reflect the new phraseology and underlying experience of all risks with payroll and loss experience assigned to that classification.

**Application:** Changes from Proposal 5 are effective on July 1, 2006 regardless of a particular state's loss cost or rate filing effective date. See the Chart Appendix for state applicability.

6. Assign the flying crew of all helicopter operations to newly defined Code 7425.

**Impact:** This change is expected to better align all helicopter operations with their associated work hazards. The resulting reassignment of individual risk payroll due to this clarification cannot be determined using any currently available data source. No modifications or adjustments to filed loss costs or rates are proposed for this portion of the recommendation. The class code's loss cost or rate will eventually reflect the new phraseology and underlying experience of all risks with payroll and loss experience assigned to that classification.

B-1399 PAGE 7

### FILING MEMORANDUM

# ITEM B-1399—REVISIONS TO BASIC MANUAL CLASSIFICATIONS FOR THE AVIATION INDUSTRY

**Application:** Changes from Proposal 6 are effective on July 1, 2006 regardless of a particular state's loss cost or rate filing effective date. See the Chart Appendix for state applicability.

7. Air traffic controllers will be assigned to Code 7403—Airport or Heliport Operator.

**Impact:** This item proposes that air traffic controller operations be assigned to newly defined Code 7403 instead of Code 8810—Clerical Office Employees NOC. Most air traffic controllers are federal employees, so this portion of the recommendation is not expected to impact many risks. The specific impact cannot be determined definitively using any currently available data source. The actual reassignment of payroll due to this change is expected to be minimal. No modifications or adjustments to filed loss costs or rates are proposed for this portion of the recommendation. The class code's loss cost or rate will eventually reflect the new phraseology and underlying experience of all risks with payroll and loss experience assigned to that classification.

**Application:** Changes from Proposal 7 are effective on July 1, 2006 regardless of a particular state's loss cost or rate filing effective date. See the Chart Appendix for state applicability.

### **IMPLEMENTATION**

The attached exhibits and chart appendix detail the changes necessary to implement this item. National content is presented first, followed by state-specific content, if applicable. A table of contents is presented following this memorandum to help navigate the filing.

This item will be effective 12:01 a.m. on July 1, 2006 applicable to new and renewal—voluntary and assigned risk policies.

#### **Exceptions:**

- In Hawaii, the effective date is determined upon regulatory approval of the individual carrier's election to adopt this change
- In Virginia, this item will be implemented for policies effective on or after 12:01 a.m. July 1, 2006, voluntary and assigned risk policies

Some states will need a transition program to implement certain proposed changes. The chart appendix details the transition implementation dates.
