RE: Analytic Report Resource on the Web (ARROW)

The MWCIA is pleased to announce the release of an enhancement to the ARROW product on our website. ARROW (formerly known as the *Actuarial* Report Resource on the Web) has been enhanced to include two new features:

1. Average Experience Modification

Queries were developed to provide access to experience modification data for the three most recent completed experience rating years. Like the other queries available, the data can be further grouped by governing code or industry group, expected loss ranges, and region within the state of Minnesota.

2. Part/Nature/Cause of Injury Criteria

The Custom Historical Triangles option has been enhanced to allow queries based on the part/nature/cause of injuries.

The ARROW acronym has been retooled to remove possible misconceptions that the resource is a product accessible to actuaries only. ARROW's robust query options will benefit underwriters, agents, actuaries and other insurance professionals interested in mining Minnesota classification and experience rating data. We encourage everyone to explore ARROW to see its capabilities. ARROW can be found on our website at <http://www.mwcia.org/arrow/Pages/Arrow.aspx>.

Remember, ARROW allows our membership to perform queries against their own statistical plan data as well as comparative statewide data. Member carriers, please contact your Web Membership Group Administrator to provide you with access to carrier specific queries.

Please direct any questions you may have concerning ARROW to MWCIA's Actuarial staff at 952.897.1737 (Option 3) or via email at actuarial@mwcia.org.
